and Durability — All
in One Equipment*

OPEN IMPELLER

CENTRIFUGAL PUMPS

STAR OPEN Series

NEW **STAR OPEN** GENERATION

STRENGTH AND EFFICIENCY IN EVERY DETAIL

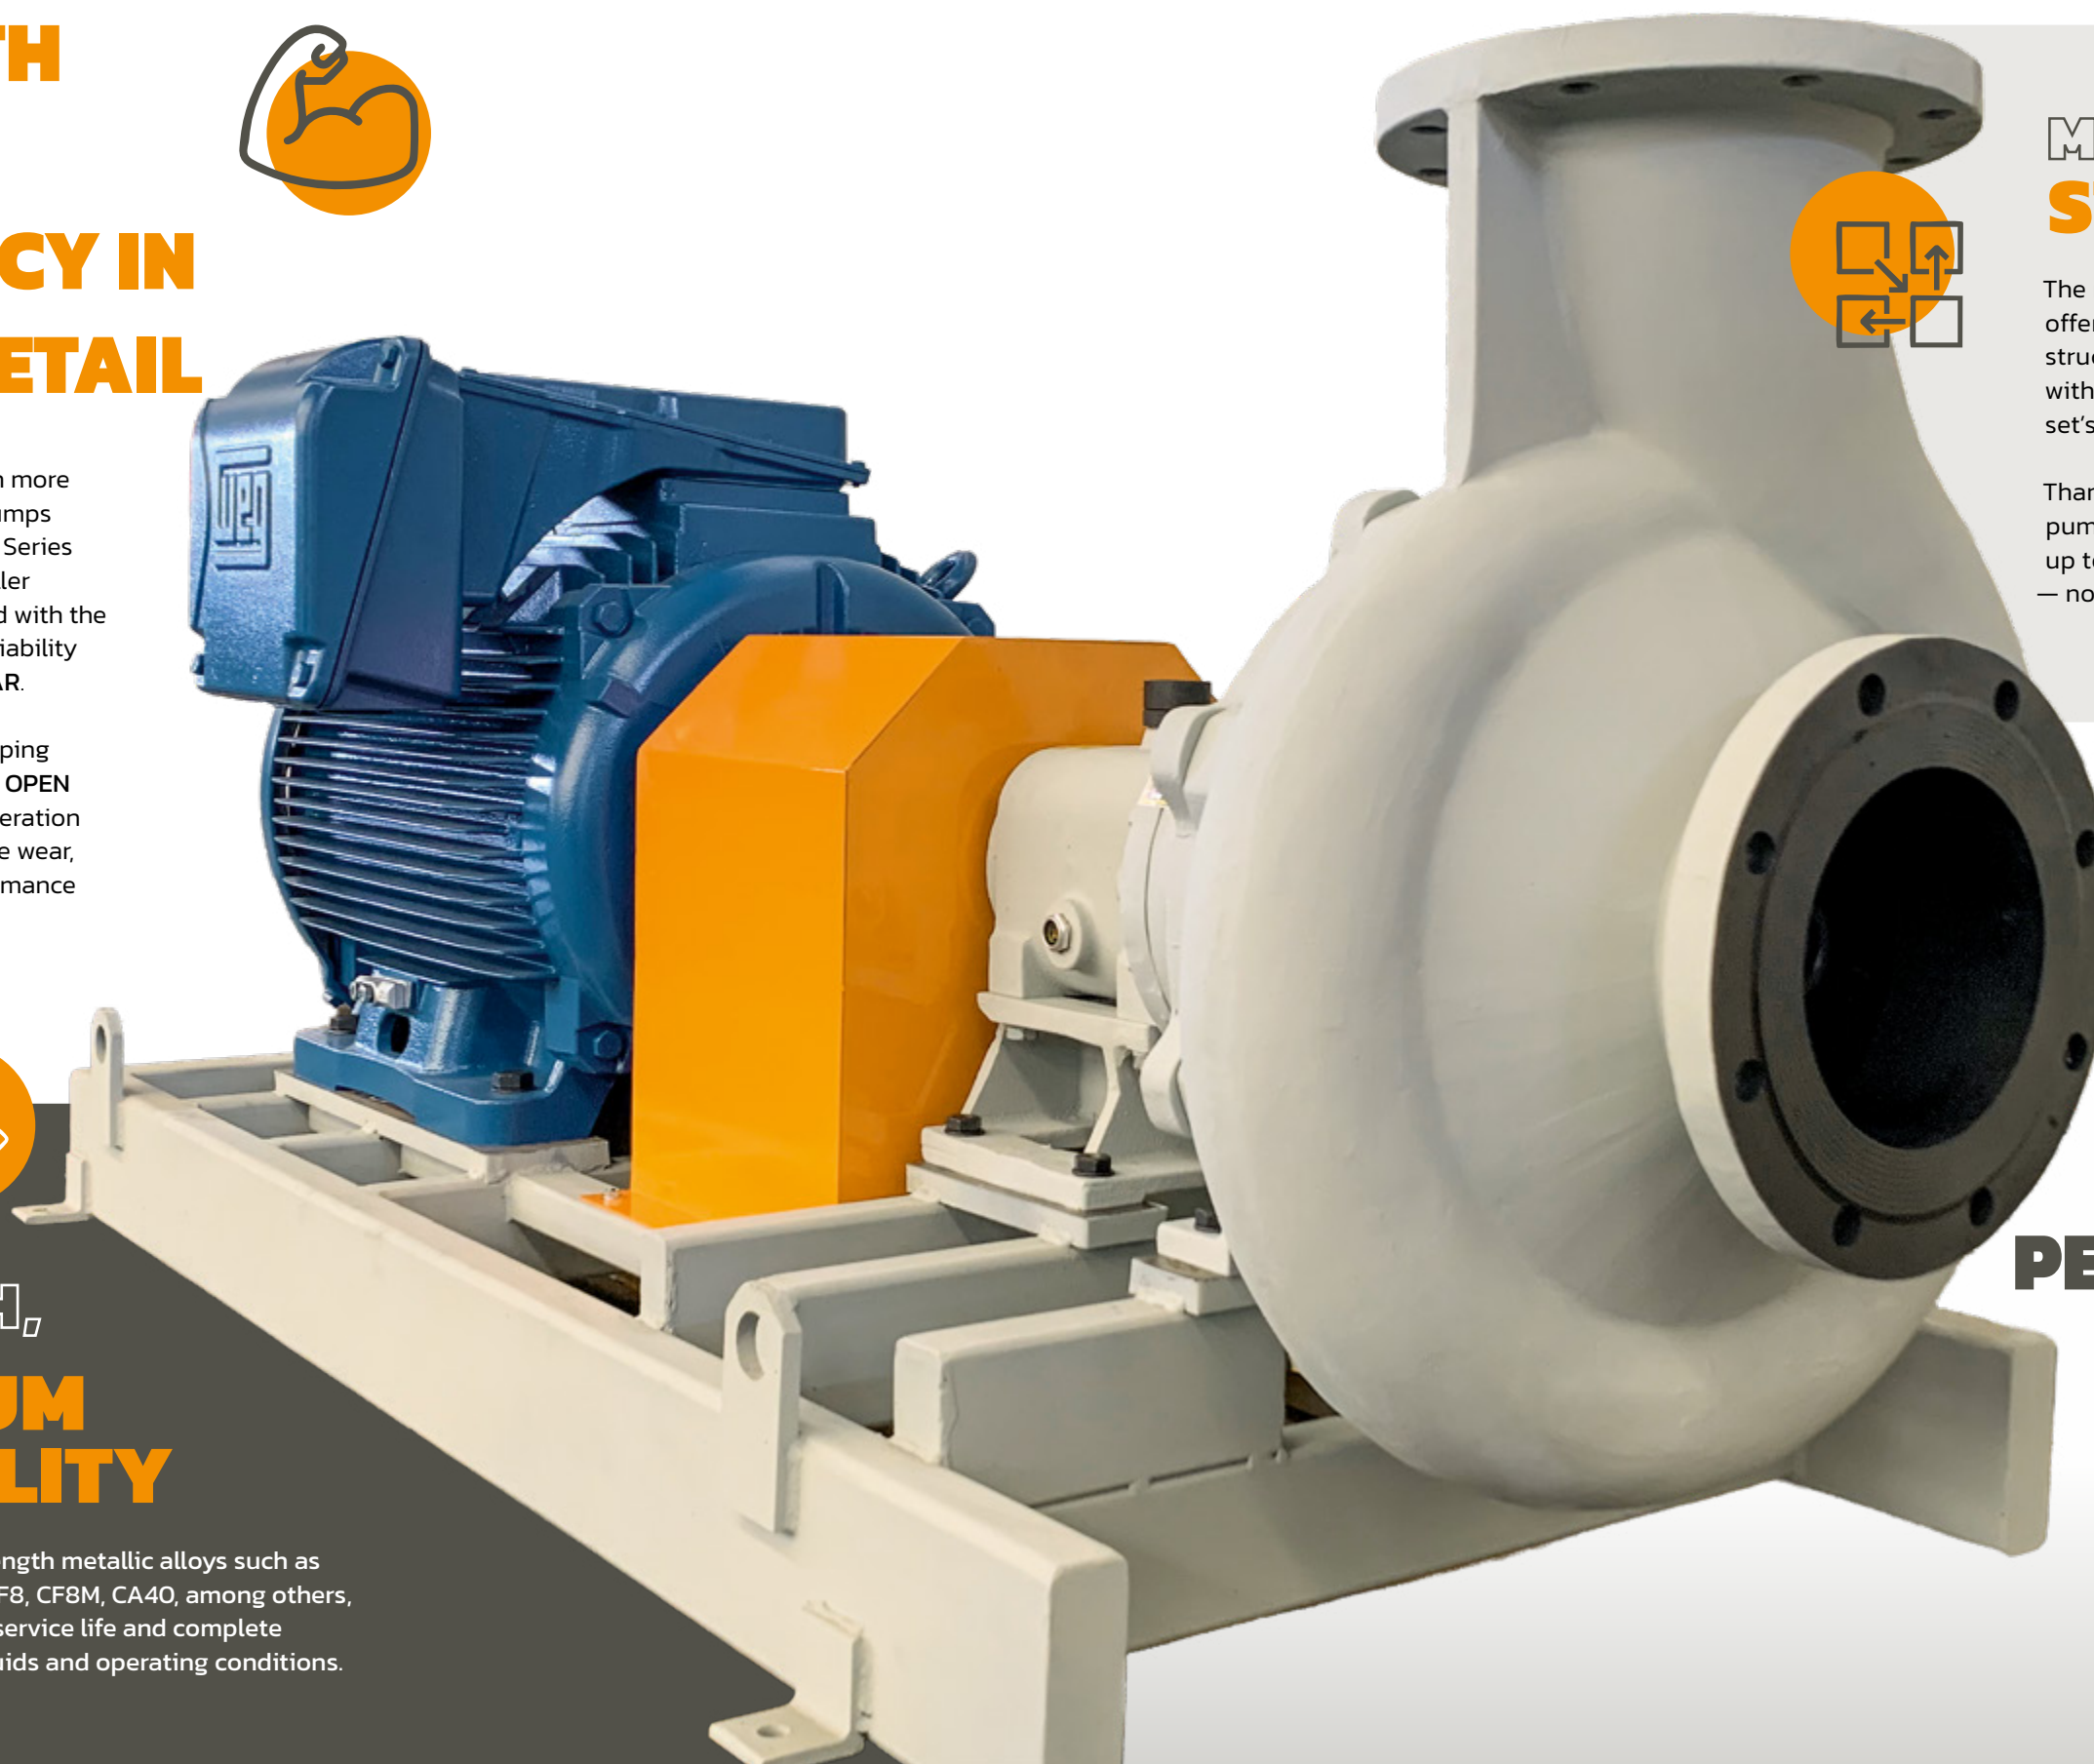

To make our product line even more complete, JAGUAR Special Pumps presents the new **STAR OPEN** Series — a generation of open-impeller centrifugal pumps engineered with the robustness, efficiency, and reliability that are trademarks of JAGUAR.

Specifically designed for pumping fluids containing solids, **STAR OPEN** pumps ensure continuous operation without clogging or premature wear, delivering outstanding performance even in the most demanding applications.

HIGH STRENGTH, MAXIMUM RELIABILITY

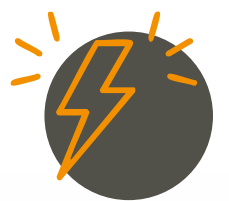

Manufactured from high-strength metallic alloys such as NI-HARD, DUPLEX, CA6NM, CF8, CF8M, CA40, among others, these pumps provide a long service life and complete compatibility with various fluids and operating conditions.

MULTIBLOCK STRUCTURE

The multiblock bearing construction offers a sturdier and more stable structure than conventional models, with reinforced walls that increase the set's durability and rigidity.

Thanks to its intelligent modular design, pumping capacity can be increased by up to 60% with minimal modifications — no need for new capital investments.

EFFICIENCY AND PERFORMANCE

With superior energy efficiency, high discharge pressure, and unmatched performance, the **STAR OPEN** line sets a new standard in industrial pumping technology.

JAGUAR

CUSTOM SOLUTIONS

Available with special packing seals or mechanical seals, STAR OPEN pumps are tailor-made to ensure the ideal solution for every application.

APPLICATION SEGMENTS

OIL & GAS

FOOD
INDUSTRY

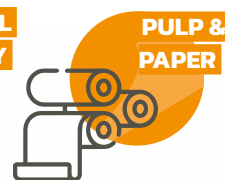

SUGAR &
ETHANOL

WATER &
SANITATION

CHEMICAL
INDUSTRY

PULP &
PAPER
